

Learning Platform

Description:

The Learning Platform project encompasses both admin and user sides, providing a comprehensive online education experience. On the admin side, functionalities include category management, access control for courses, and the ability to create quizzes, assignments, and notes. Admins can control user access to courses and manage content effectively. The user side focuses on a streamlined experience, allowing users to view available courses, make course selections, pay for chosen courses, and gain access to course materials.

Admin Side:

1. Category Management
2. Access Control
3. Content Creation (Quiz, assignment, notes)

User Side:

1. Course Exploration
2. Course Selection
3. Payment Integration
4. Access to Course Materials
